mdy017192@gmail.com

https://portfolio-mu-two-54.vercel.a

Skills

Web Development

HTML, CSS, JavaScript, Node.js, React, Express, MongoDB

Frontend

React, Tailwind CSS

Backend

Node.js, Express.js, REST APIs

Database Management

MongoDB

Version Control

Git, GitHub

Tools & Technologies

Vite, Axios, Visual Studio Code

Learning Focus

MERN Stack (MongoDB, Express, React, Node.js), Full-Stack Development

Languages

Bangla

English

Motivated and detail-oriented aspiring Full-Stack Developer with a strong foundation in the MERN stack. Recently completed a Diploma in Computer Science & Technology, with hands-on experience in building web applications using React, Node.js, Express, and MongoDB. Eager to apply problem-solving skills and collaborate on innovative projects while continuously enhancing technical expertise

Profiles

alamin99ab

Alamin

Education

City Polytechnic Institute — **March 2022 - ongoing**
Khulna — Computer Science & Technology

Deara High School — **january 2013 To February 2019**
Satkhira — Secondary School Certificate
3.94

Certifications

MERN Stack Web design And Development
Ostad
https://ostad.app/

Secondary School Certificate — **2019**
Board of Intermediate and Secondary Education , Jashore

Projects

Secure Mail & SMS System
Secure Mail & SMS System is a secure communication solution that allows users to send and receive encrypted emails and messages using PGP encryption.
https://pgp-frontend-five.vercel.app/

Onimo Secure Mail & SMS System is a secure communication solution that allows users to send and receive encrypted emails and messages using **PGP encryption**.
The backend is built with **Express.js** and **MongoDB**, ensuring user data safety with bcrypt password hashing.
The frontend uses **React** and **Tailwind CSS** for a modern, responsive user experience.
The main focus is strong **authentication**, **encrypted messaging**, and **data privacy**.

Onimo AI - AI-Powered Chat Application
A skilled Full-Stack Developer with proven experience leading the development of a complete AI-powered chat application ("Onimo AI") using a microservice architecture. As the Project Lead, I was responsible for designing the system architecture, developing the backend with Node.js, and integrating the Python AI service. My expertise includes performance optimization and building and testing robust APIs. I am passionate about leveraging new technologies to create innovative and effective solutions.

https://onimo-frontend.vercel.app/

Onimo AI - AI-Powered Chat Application *Project Lead & Primary Developer*

- Led the overall project and designed the complete system architecture based on a microservices pattern.
- Developed the user management backend service using Node.js and Express.js, including the implementation of Google Authentication for secure logins.
- Integrated the Python-based AI backend with the main application, ensuring seamless data exchange between the distinct services.
- Addressed and solved performance optimization challenges by leveraging Node.js's non-blocking I/O model and implementing MongoDB indexing.
- Created and tested clear, well-documented API endpoints using Postman to facilitate smooth frontend-backend communication and resolve integration issues.

Technologies Used: React.js, Node.js, Express.js, Python, Flask, MongoDB, Tailwind CSS, Vercel, Render.
